10 SIGNIFICANCE (use attachment sheet if necessary)

a Architect/Builder/Engineer
Stulting bros.
b Style/Period None
c Date(s) 1865

This is said to be the oldest house in Hillsboro put together with wooden pins and has hand hewn frame work with 4 x 4 windows. Brother of Cornelius Stulting where Pearl Burk was born.

Old part was fronting on Rt. 219 that was used for housing the toll gate keeper.

John and James Bridger were slain on this ridge during the last raid made by Indians in what is now Pocahontas County. The Bridger boys had responded to a call for help after Henry Baker and Richard Hill had been killed. The Bridger brothers and Nathan, a colored man belonging to Lawrence Drinnon, had left the main party to take a short cut when attacked by the Indians. Nathan had stopped to fasten his moccasins and thus was out of sight of the Indians and escaped harm.

h. Two story "T" shape house with gable roof. Front (1910) has projecting 2 story portico with gable. The porch has eastlake spindles. There is a projecting bay on the side with a semi conical roof. The rear (ca-1810) has a full porch with simple detailing.

10. Significance: Amos (1750-1850) was the son of Charles Kinnison. He married & settled on this property. His son, John Barlow (1819-1900) stayed on the farm and operated a Blacksmith shop.

Original part of house believed to have been built about 1810 by Amos Kinnison, son of Charles, the pioneer. Three rooms on the 1st floor and two on the second were part of the original house. W. W. Kinnison, who built many houses in area, built front addition of 4 rooms, porches and attic in 1910 when house was owned by T. Frank Kinnison, grandson of Amos and grandfather of Virginia.

Part of building dates to Fort Day, c.1780. Purportedly built by John McNeel who settled in the area in the late 1700's. He was in the Militia, in Capt. John Stuart's Co. of Greenbrier Volunteers, Botetourt County Regiment. He took part in the Battle of Point Pleasant on Oct. 10, 1774. The McNeel Family is very prominent in the county and the farm is still in their name. John McNeel died in 1825.

Architect/Builder/Engineer
 Style Period
Four square
 Date(s) 1897

Mr. William Auldridge owned the house and lived there many years. He owned and operated a store and post office and had been a school teacher. After his death his son, Rheuben, and wife who had moved into the Pennell House (Auldridge property) moved into the Auldridge house with his mother. Rheuben continued to operate the store and post office until his death.

West: Some people think an Indian trail or branch of a trail came through Bridaer Gap and around the mountain pass the old A. E. Boblett home, continuing around the natural "benches" of the Millilar Mountain (to the west and opposite Pickman School), on around the mountains and through the Cranberry region. There seems to be a little trail west along the base of these Mt. Millars. East: The trail that came down - be seen in places below the present road, along the edge of the Indian farm, (on next page)

3. CA 1865

This is on site of where Fort Day
(1774) was situated. Isaac McNeel
was the person who built the 1868
Mill at Mill Point. He was sheriff
during the Civil War and president
of the County Court. John Lanty,
his son (1878-1955) was deputy
sheriff, on the county commission,
and president of the Bank of Mar-
lington. His wife, Nora, was among
the first registered nurses of
West Virginia and the first super-
intendent of nurses at Marlinton
Hospital.

SIGNIFICANCE (use attachment sheet if necessary)

Architect/BUILDER/Engineer
Jake Hill, builder, lived at Marlinton where he worked
 in First National Bank. Related to
 Hillsboro Hills.
 Style Vernacular
 Dates 1888

Matthew John served in the 19th Virginia Cavalry in the War.
 He was active in the United Confederate Veterans and was the
 last surviving veteran in the county. He was sheriff (1889-90),
 N. Va. House of Delegates (1897-98), on the County Court, and
 first president of the Bank of Marlinton (1899).

Denmar Sanitarium/Hospital

D-0045

Denmar (Sanitarium) Hospital, located approximately 15 miles south of Marlinton, 5 miles east of Hillsboro off U.S. Route 219 (Denmar Road) was established by an act of the W. Va. Legislature in 1917 for the care and treatment of persons of the Negro race afflicted with tuberculosis. The hospital is healthfully situated on a 185 acre tract of land at about 2,200 feet above sea level on an eminence overlooking the Greenbrier River in the Allegheny Mountains. Present hospital building has a capacity of 240 beds, making it one of the largest of its type for Negroes in the United States.

page 305, West Virginia Blue Book 1955

In 1938, this same facility was designated a hospital by the Legislature and was reorganized to accommodate any medical treatment and/or custodial care in a medical environment. In the 1970's, Denmar was designated and certified for Medicaid patients and now serves as an intermediate treatment facility or more commonly referred to as a Nursing Home. On the hospital grounds are former nurses quarters which are now licensed Personal Care facilities for the Department of Human Services.

 2. Style/Period
 3. Date(s)

This is a very old home used by several generations of the Callison family. James Callison Sr., one of the earliest settlers of the area had this land in 1783-1784. An earlier home stood not far from the present one. All of the children of Josiah Callison, Richard Callison and Denny Mount Callison were born in the present home. In 1787 a circuit rider preacher, John Smith, wrote of coming to the James Callison place and preaching there. He wrote of the "ordinary" house which at that time meant a place where meals were served to travelers. Some believe the present home was the one of which he wrote. The house stands on a ridge that slopes down from Droop Mt. and is from 50 to 75 ft. above the level of Trump Run. It has a commanding view of the Trump Run Valley.

Both men commemorated by these monuments were instrumental in the success of the last union charge which broke the defenses of the confederate left flank during the Battle of Droop Mountain, Nov. 6, 1863. Monuments are an important reminder of the specific sacrifices involved in the U.S. Civil War.

RECOMMENDATIONS

This initial survey of Pocahontas County uncovered a number of sites that are considered to be of potential historic significance. These sites are located throughout the county and pertain to a number of the themes identified. Recommendations for further action on these sites are presented below. A number of recommendations apply to all of the sites in general or to activities of the Historic Landmark Commission. These are presented first.

The first recommendation is that the Landmark Commission continue the work begun by this survey. This was only designed as a very general overview of the possible resources that exist in the county. As that, this project has succeeded. There are though a number of areas that need additional research as well as some themes. These areas include those that were not covered under this project due to time or other constraints. The Little Levels area is one where a large potential exists but was barely scratched by this survey. The Slaty Fork area is another where more research is necessary. The area in the south west of the county requires more inventory, as well as that to the north west. All of these areas should be surveyed as were the areas completed this summer.

Another recommendation is the listing of some of the sites identified on a county Historic Landmark Register. This is important as it provides the county a method of recognizing sites that are significant to the county or specific localities in the county, but may not be significant enough to warrant listing on the National Register. It is also a method of short cutting the National Register since formal listing may sometimes take up to 9 months. Projects that need immediate recognition can be listed on a County Register until such time is available for further listing. The county register can also recognize periods or areas of significance that may not meet federal criteria such as the minimum age level, 50 years.

In creating a County Register, a logical and standardized nomination process and criteria for evaluation must be established. Normally, beginning with the National Criteria and modifying it is adequate. One modification may be lowering the age limit to 40 or 30 years if a large number of sites that are significant to the county fall into that period. Another is to recognize specific themes that are particularly significant to the county. These may be Railroads; Chemical Industry; Oil and gas; River transportation; etc.

The nomination process can be simple to make it accessible to the public. For example, one county requires the completion of a State Inventory Form as the documentation for a nomination. This is submitted to the Historic Landmark Commission at one of the regularly scheduled meetings or mailed in time to be reviewed at

meeting. At the following meeting the Commission votes whether to accept it for listing after discussion or receipt of any additional information it may have requested. This meeting delay on voting allows the preparer or anyone interested to comment on the nomination. A process such as this, or any that meets the requirements of the county can be employed. The important thing is to have a regular logical process for listing.

Recommendations that refer to the particular sites reviewed in this project are presented below. They are divided into a number of major categories. The first is sites that the survey team recognizes as having major historical or architectural significance and recommends for National Register listing as individual sites. The second is sites that appears to have some significance but may not be eligible for National Register listing. These should be considered as local landmarks and listed on a local register. During this listing process, additional information can be provided that would aid in the decision on National listing. In other words, additional research may be necessary on these sites. The third category is sites that should be investigated as potential Historic Districts. To do this, intensive level surveys of these sites should be accomplished. The fourth category is that of potential thematic nominations. Again the sites in these themes or the themes themselves will need to be investigated on a more intensive level.

CATEGORY ONE

The sites in this category were determined to have such major significance that they were recognized immediately as eligible for National Register Listing. These are sites that are of primary importance to the county or history of the state or nation. A list and brief discussion of these sites follows. Please refer to the appropriate inventory form as indicated by the Survey number in parentheses. More in depth research will need to be done on these sites to complete nomination forms.

1. A004 Traveller's Repose. This is a very significant site in the transportation theme of the county as a stop or inn on the Turnpike. It is also the site of a Civil War battle and is identified on the map accompanying the report in the Official Record's.
2. A008 Rothkugel Plantation. This site is significant as the beginning of forrest management in the timber industry.
3. A0027 Isaac Moore Farm. This is a significant farm in the county and an intact architectural site.
4. A0044 Dr. Moomau House. This is a very intact and significant piece of architecture for the county with the complex of buildings that relate to the practise of Dr. Moomau.
5. A0049 Isaac Moore Jr. House.

6. B007 Sharp's Complex. This is a significant complex of buildings relating to a prominent family in the county and includes the residence as well as outbuildings and stores.
7. D0010 Colonel Paul McNeel House. A significant family in the county and related to the military theme.
8. D0013 Kinnison House.
9. D0027 Colonel John/Fred Ruckman House. A significant family in the county.
10. D0036 J. Lanty McNeel House.
11. D0044 Hillsboro Colored School. A very significant site in the history of the black people of the county.
12. C002 Joe Buzzard Residence. A site significant in the development of the Huntersville area.
13. C003 Will Yeager House. A significant family in the county.
14. C0011 Pocahontas County Courthouse. Fairly intact courthouse which represents the significance of the government in the county's history.
15. C0026 The Old Opera House. A significant site in Marlinton, this may be the oldest structural concrete building in the state.
16. C0030 J.B. Hannah House.
17. Denmar Hospital. Originally constructed as a hospital for black tuberculosis patients in 1917, it is currently a Nursing home.

CATEGORY TWO

This category should be considered as sites that may have potential for National Register but need additional research to reach that decision. They should all qualify as local landmarks at least for their examples of regional architectural styles or their association with persons or events significant to the county. The sites in this category correspond to the list of inventory sites as presented in other sections of this report. Refer to the individual inventory forms for specific information or mapping location. During the course of research, some of these sites may be determined to not qualify for listing due to lack of integrity or other reasons.

CATEGORY THREE

In this category are sites that were reviewed as potential histo-

ric districts. They all have an association of their component that combines to form a significance that may be greater than any of the individual sites. Rural historic districts as well as ones in more urban settings are listed. In all cases more research is necessary and intensive level surveys should be conducted in each of the districts. They are listed in priority order but funding or other circumstances may necessitate completing one before another. It should be recognized that it is an accumulation of sites and structures that gives an historic district its significance, therefore, losses of some of these sites may preclude listing of the district.

A historic district is divided into two types of sites; contributing and non-contributing. There should be no more than 25% non-contributing sites in a district. The contributing may be further broken into pivotal or major sites and contributing ones. Most districts have 10% or so pivotal sites.

1. Huntersville. This is the original county seat of Pocahontas county and many sites related to the court are extant as well as later development sites.
2. Hillsboro. Perhaps one of the older communities in the county, there are a large number of extant sites in the town.
3. Marlinton. The town should be surveyed. Portions of it are in relative intact condition, though some has been damaged by flooding.
4. Green Bank. An old settlement, many sites identified in the survey were from this town, including The Hitching Tree A0046, the Green Bank United Methodist Church A0016, and The IOOF Building A005.
5. Edray. A small rural area, the sites in this community are intact, though not in use anymore.
6. Cloverlick.
7. Durbin. This is a significant town in the development of the timber industry.
8. Millpoint. A significant settlement area in the county.

CATEGORY FOUR

The sites in this category relate to each other through a particular theme. Some may be individually eligible but all gain significance through their interrelationship of representing a period or area of significance in the county's, state's or nation's history. The themes are presented below with some suggestions of sites to be included within them. More research within each theme will be needed to compile a representative sampling of the resources for protection.
